It is alike our interest, and that of all those from whom we would buy, that there sho'd be the fewest practicable restrictions upon

the interchange of commodities.

There can be but little rivalry between ours and any manufacturing or navigating community, such as the Free States of the American Union. It must, therefore, follow therefrom, that mutual interests would invite good will and kind offices. If, howver, passion or lust of dominion should cloud the judgment or inflame the ambition of those States, we must prepare to mert the emergency, and maintain by the final arbitrament of the sword, the position we

We have resorted to the remedy of a separation, and henceforth our energies must be directed to the condition of our affairs and the perpetuity of the Confederacy which we have formed.

If a just protection of our mutual interests shall permit us peaceably to pursue our separate political careers, my most carnest desire will have been fulfilled; but if this be denied us, and the integrity of our terri ance of the production, tory and jurisdiction be assailed, it will but remain for us with firm reselve to appeal to deserved arms, and invoke the blessing of Providence on a just cause, as a consequence of our new condition, and with a view to meet anticipated wants, it will be necessary to man, provide a Specuy and efficient organization of the branches of the executive Depart-

I enter upon the duties of the office to which I have been chosen, with the hope that the beginning of our career as a Confederacy may not be obstructed by hostile opposition to our enjoyment of the separate mit to their posterity. CITY OF APPLETON. Saturday, March 2, 1861. Supreme Court.

We understand that attempted negotiations have been attempted to get the Dimocrats generally to support James H Knowlton, the Republican Farm Mortgage candidute for Associate Justice as against Judge Cole. Others may do as they like, but we shall oppose Knowlton to the ead. He is a scheming political trickster, and a thorough demagague; and, being altogether smarter than Judge Cole, is capable of doing more mischief. His greatest renown grew out of his celebrated investigation into the Bashford-Kilbourn Lz Crosse Land Grant Corruption. The Land Grabbers would not pay his price; therefore, he went ! in for exposing their rascality. He is a beautiful man for Indge, and as Wisconsin political morals have sunk so low as to leaders, our sale surprise is that the Republicans have not presented him as a party candidate.

in from three to mx weaks. This article is the only one of the kind used by the French, and in London and Paris it is in universal use.

It is a beautiful, seemonical, soothing, yet stimulating compound, acting as if by magic on the roots, cauring a beatiful growth of inxuriant hair. If applied to the scalp it will cure baldness, and cause to spring up in place of the bald sponts a fine growth of new hair. Applied according to directions, it will turn red or towy hair dark, and restore gray thair to its original color, leaving it soft, smooth and flexible. The "Ouguent" is an indispensable article, in every gentiaman's tolest, and after one weak's use they would not for any consideration be without it.

The aubscribes are the only Agents for the article in the United States, io whom all orders must be addressed.

Scrofula, or King's Evil, is a constitutional disease, a corruption of the

blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No orzan is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, dis-ordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venercal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I

will visit the iniquities of the fathers upon their children." Its effects communice by deposition from the cod of corrupt or ulcerous matter, which, in the langs, liver, and internal organs, is termed s; in the glands, swellings; and on the surface, eruptions or sore. This foul cor-ruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scroulcus com-plaints, but they have far Ic-s power to with-stand the attacks of other diseases; consoare still rendered fatal by this taint in the stem. Most of the consumption which de-nates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain,

are aggravated by the same cause. One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleause it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in
